- b) Trees should be trimmed regularly prior to a storm in preparation for possible flooding.
- c) Doors, windows, or any building openings should be secured.
- d) Driving through flooded areas should be avoided; power lines may be down.
- e) Be alert to gas leaks. Candles and other types of open flames should be carefully monitored.
- f) Flood warning systems will be in place within Miami-Dade County. The following local radio and television stations will provide information as part of the Emergency Broadcast System:
